

# Customized Skin Solutions

Our treatments are tailored to each individual's skin requirements. Targeted products and advanced technology is combined to give you results.

We have created facials at different levels for changing skincare needs. Each level differentiates the intensity and ingredients for each treatment.

## Maintenance Level M

Restorative session involving deep exfoliation, with the use of a serum .

## Treatment Level T

Employs advanced facial equipment to fight the signs of environmental stress and aging effects on skin. Uses customized serums and masks to cater to all skin types and treat different skin conditions.

## Advanced Treatment Level A

Using IPL, PTF or RF to reverse signs of aging and environmental stress and also to fight acne. Works to boost collagen synthesis to rebuild skin structure.

***\*The listed face treatments are part of a wide range of customized treatments available***
